EDUCATION

Sirindhorn International Institute of Technology(SIIT), Thammasat University **August 2022 - May 2026**

Bachelor of Engineering, Computer Engineer Major, GPA 2.55
Relevant Courses: Human Computer Interface Design

EXPERIENCE

House of Dev Technology Co., Ltd. **Jan 2026 - May 2026**

UX/UI Designer & Coordinator

- Redesigned Verscan's user interface and onboarding experience to create a clearer and more intuitive journey for new users.
- Designed interactive game UI for Foremost that was implemented and launched at a product event, where I tested the live experience to verify the interaction flow and final design implementation.
- Collaborated with the Foremost team, internal stakeholders, and developers to gather requirements and refine designs based on feedback.

PROJECTS & RESEARCH

Project Play N' Learn - Gamified Learning App Prototype **May 2024**

- Led user research with 34 respondents and designed teacher and student flows for a gamified learning experience.
- Created low- and high-fidelity interactive prototypes in Figma, then conducted Think-Aloud usability testing with three students and one teacher to identify and improve usability issues.

Netflix Database Design **September 2024**

- Analyzed Netflix's business processes and designed a 39-table relational MySQL database.
- Developed 48 SQL queries to analyze subscriptions, content activity, advertising, merchandise, and inventory.

Steam Game Distribution Platform **November 2024**

- Designed and implemented the HTML/CSS interface and user journeys for game discovery, publishing, checkout, library management, and reviews.
- Co-designed the ER diagram and MySQL database in collaboration with a three-person development team.

PayMate - Receipt Scanner and Expense Analyzer **March 2025**

- Designed an end-to-end Figma prototype for receipt scanning, expense categorization, budgeting, bill splitting, and group expenses.
- Translated 24 use cases and 49 functional requirements into user flows, navigation, wireframes, and interface designs.

Implementation of Additively Homomorphic and Quantum-Resistant Encryption on MapReduce **May 2025**

- Co-developed a privacy-preserving MapReduce framework using NTRU encryption and Searchable Symmetric Encryption.
- Tested the framework with up to 100,000 records, encrypting 100,000 rows in approximately 35 seconds.

Edge-Assisted Post-Quantum Secure Pipeline for Remote Forensic Data Collection **November 2025**

- Co-developed a secure edge-to-cloud forensic data pipeline using Kyber, XChaCha20-Poly1305, CP-ABE, and Hyperledger Fabric.
- Evaluated secure key provisioning and blockchain audit queries across ledger sizes of up to 5,000 events.

Understanding the Effects of Gamification in E-commerce on Motivation, Engagement, and Loyalty **December 2025**

- Researched how different gamification mechanics affect motivation, engagement, and loyalty among Shopee and Lazada users.
- Analyzed questionnaire data in SPSS AMOS and identified transaction-based rewards as the strongest drivers of user loyalty.

CERTIFICATION

Google UX Design Professional Certificate - Google via Coursera **September 2026**

Credential: https://coursera.org/verify/professional-cert/5A25CFTO7QGC

SKILLS

Programming languages: Python, Java, SQL, C, C++, MATLAB, CSS, HTML

Computer software/ frameworks: Figma, MySQL

Strengths: UX/UI Design, Human Computer Interaction, Database Design

Languages: English(TOEIC 700/990), Thai (Native)
